EDUCATION

HKBK College of Engineering Bengaluru, IN
Bachelor of Engineering in Computer Science and Engineering — 8.68 Aug 2022 – Present
Relevant Coursework: Data Structures & Algorithms, Theory of Computation & Automata, Operating Systems, Computer Networks, Object-Oriented Programming, Database Management Systems, Big Data Analytics, Machine Learning

EXPERIENCE

Unimad Remote
Full Stack Developer Intern Oct 2025 – Present

- Built a job application board from the ground up, implementing intuitive flows and improving application completion rates by 24%.
- Enhanced resume builder templates and resolved major UX issues across the editor, cutting user friction and reducing error occurrences by 31%.
- Converted high-fidelity design files into production-ready interfaces, improving design accuracy and visual consistency by 26%.
- Revamped key UI sections through layout modernization and component restructuring, resulting in a smoother experience and a 21% increase in overall usability.

Metrograsp Technology Private Limited Bengaluru, IN
Design Engineer Intern Nov 2024 – Jun 2025

- Spearheaded the end-to-end design and rollout of Metrograsp’s unified brand identity and design system, ensuring consistency across 4+ product lines.
- Created UX flows and prototypes for health and wellness products tailored to the Indian market, optimizing for cultural relevance and usability.
- Drove the launch of a new sub-brand, contributing to a 40% increase in digital engagement in the first quarter post-launch.
- Facilitated cross-functional alignment between design, engineering, and product teams to ensure brand integrity and user-centered decision-making.

PROJECTS

AquaAware India – Real-Time Water Quality Monitoring Platform 🐱 Jul 2025 – Present
Built a full-stack web platform using **React + TypeScript** and **Express** to monitor real-time water quality across 8+ Indian cities. Enabled 300+ users to report pollution incidents and visualize trends via interactive maps and dashboards.

TECHNICAL SKILLS
